Summary

Computer **Engineering student** with skills in MERN Stack, ML, and backend API development. Strong foundation in DSA (C++), problem-solving, and building scalable applications for real-world use cases.

Education

- **Pune Institute Of Computer Technology (PICT)**, BE in Computer Engineering Aug 2023 – June 2027
GPA: 9.0 / 10
Relevant Coursework: Data Structures & Algorithms (C++), OOP, Web Development, Operating Systems
- **HSC**, JKBOSE — 95.4%
- **SSC**, JKBOSE — 94.8%

Projects

- **Wellness Tracker — Health Monitoring Platform** *MERN Stack*
 - Developed a full-stack web application to track daily health metrics, habits, and activities.
 - Implemented secure JWT authentication, personalized dashboards, and real-time habit analytics.
 - Designed responsive UI and optimized backend APIs for faster data updates.
 - Used by 80+ users during hackathon testing; achieved **Runner-Up position**.
- **Modified Early Warning System (MEWS) — STC Project**
 - Built ML models to predict in-hospital mortality and unplanned ICU transfers from early vitals.
 - Engineered time-series features from ~MIMIC-IV dataset (HR, RR, SBP).
 - Compared XGBoost, SVM, and Ridge Regression; improved AUC from **0.83** → **0.89**.
- **GoSafe — Safe Routes Recommendation Application**
 - Built a safety-aware routing app using OSRM, OSM, and Nominatim APIs to compare safest vs. shortest routes.
 - Integrated Firebase Firestore with **100+ real-time crime data updates**.
 - Developed secure admin dashboard for law enforcement and implemented location-based notifications.

Experience

- **AI/ML Intern — AICTE Samarthan Program, NITTTR Bhopal** May 2025 – June 2025
 - Built regression and LSTM-based models for house price prediction, applying preprocessing and feature engineering on real datasets and delivering a complete ML pipeline with evaluation results.
- **API Testing Intern — Cequence Technologies** Sep 2025 – Oct 2025
 - Performed integrated API and MCP testing using Cursor, Postman, and Swagger.
 - Validated APIs across GCP Billing, Gmail, Zendesk, and Workday integrations.
 - Reported and verified 15+ bugs, improving test coverage and API performance.

Technical Skills

Languages: C++, JavaScript, Python

Full Stack: React.js, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS

Tools & ML: Git, GitHub, VS Code, Postman, Scikit-Learn, Pandas, NumPy

Achievements & Activities

- **Publicity Head** — NSS, PICT
- **Runner-Up** — Hackathon, Sinhgad College of Engineering (Wellness Tracker)
- **Lead Coordinator** — Fandom ,Pulzion'24
